

Vaughn McManamna

vaughnmcmamanma03@gmail.com [Portfolio](#) [LinkedIn](#)

Victoria, BC

Education

Bachelor of Computer Science, University of Victoria Sep 2021 – Present
Relevant Coursework: Data Mining, Mining Massive Datasets, AI, Calculus I–IV, Probability & Statistics
Matrix Algebra, Algorithms & Data Structures, Database Systems, Computer Graphics, Systems Analysis

Skills & Tools

Languages: Python, JavaScript, Haskell, SQL, C, Rust (learning)
Frameworks & Libraries: scikit-learn, D3.js, Plotly.js, pandas, NumPy, Figma, React (learning)
Concepts: Machine Learning, Data Visualization, Functional Programming, Full-Stack Development

Projects

Call of Duty Statistics Analyzer & Predictor Jan 2026
Python, JavaScript, D3.js, Plotly.js, scikit-learn

- Built a full-stack analytics system that turns gameplay data into interactive dashboards and visuals
- Created a Decision Tree model that identifies key performance drivers with 73.9% accuracy
- Automated processing of 1000+ match records into clean, structured datasets for analysis and modeling
- Designed modular architecture separating data ingestion, processing, visualization, and prediction
- Created interactive charts with filtering, pan/zoom, and mobile-first layouts

ML / Automation Portfolio 2024 – 2025
Python, JavaScript, scikit-learn, D3.js, Plotly.js

- Built an interactive portfolio showcasing real machine learning workflows and data pipelines
- Created demos for classification, regression, and automated data processing
- Designed reusable components to support fast experimentation and project scaling

Deal or No Deal – NBA Edition Jan 2026
JavaScript, Vite, Tailwind CSS

- Built an interactive NBA-themed game with dynamic state logic and automated gameplay systems
- Designed modular front-end architecture for clean structure and maintainability
- Created responsive UI for smooth user interaction

UVic Gym App Redesign Dec 2024
Figma, Draw.io, Systems Analysis

- Lled a full redesign of the gym booking experience using user-centered prototyping
- Visualized system flows to identify pain points and inefficiencies
- Proposed workflow improvements that increased usability and reliability

Experience

Barb's Fish and Chips — Dishwasher / Front of Staff / Cook May 2025 – Nov 2025
Victoria, BC

- Balanced kitchen and customer-facing responsibilities during high-volume service
- Assisted customers, resolving issues quickly and maintaining smooth service

Vancouver Island Brewing — Warehouse & Delivery Assistant May 2024 – Aug 2024
Victoria, BC

- Streamlined shipment organization and truck loading to improve delivery efficiency
- Supported time-sensitive logistics operations across warehouse and delivery workflows
- Assisted with customer coordination and on-site delivery problem-solving
